CREATIVE ARCHITECTURAL SOLUTIONS

By design, the Jinsei restaurant was intended to attract select discriminating patrons who appreciate a simple yet elegant dining experience. The lines are crisp and clean with rich finishes and materials that hint at a Japanese vernacular. A perfect backdrop for Asian gastronomic offerings such as Kobe beef, tempura, flown-in fresh nigiri & sashimi.

Creative Architectural Solutions partnered with Chute Gerdeman Design to implement this small suburban gem of a prototype. Now, a highly successful Birmingham destination, it has exceeded all expectations and will surely be repeated (and imitated). With seating of approximately thirty patrons within the serpentine-shaped lounge area, the formal dining tables and, of course, the sushi bar offering a far more authentic experience, Jinsei is more akin to a restaurant in New York or San Francisco than anything else you can find in the Birmingham area. A fact that has certainly not escaped the dining public, to which many a satisfied restaurant reviewer will attest.
